The OPL3000 Motorized Polarization Scrambler is a program motorized control polarization scrambler. Its polarization controlled capability enhances measurement speed, accuracy, and overall productivity. The continuous length of fiber enables high power and ultra-low insertion loss. This design offers a wide range of Auto Scan rates and high incremental angular resolution. Four-fiber knob loop design has proven to provide excellent control with ultra-low power variations (PDL). This reliable design allows for a wide range of applications from component testing to PMD related activities.

Low Insertion Lonroven ɔ

Our company provides high performance, high value, low cost, affordable test and measurement instrument solutions for our customers. Our extensive support sources can help you choose right Our products for your specific applications and apply them successfully. Every instrument system we sell has a global warranty. All of our instruments are with at least 12 months factory warranty.

Our company' all test and measurement instruments and systems meet their advertised performance and functionality. When you select our product, we can help your product operation with our decade experiences, and provide the basic measurement assistance for the use of special capabilities.
